The Handbag: How to keep it Classy

A purely educational perusal.

1. The material of the bag should be durable and easily cleaned.

Light colored cloth is only one rogue pen away from a complete disaster.

You've got a fighting chance with leather or a leather-like material.

3. If you must do lumpy, save it for your off-time.

Keep it structured for work.

5. Keep your handbag de-cluttered. If your (highly necessary) stuff doesn't fit into your handbag, consider a brief case or tote.

2. True. Your bag might have a fancy logo, but you just PAID to advertise for that fancy logo.

Keep that in mind next time you shop for a bag.

"Look everyone! I'm over-sized and all c'sh."

"I may not be able to store everything, but at least I've got jelly bean letters!"

4. Generally, the warmer the weather, the lighter the color; the cooler the weather, the darker the color. Neutrals and medium to dark shades of primary colors are perfect for year 'round.

6. Going for a little zest? Try a bright color OR some bling OR a light-hearted theme, but not all three at once.

A handbag can be a great conversation piece...but only if it's good conversation.
